

# Summer School of Personality Science (SSPS)

## Overarching Goals:

- Invest in the future of personality psychology
- Bring together the best and brightest students interested in personality science
- Build strong international ties between personality psychologists

## Opportunities for Students:

- Rich, diverse, and stimulating mini-curriculum
- Hands-on teaching of current practices and trends in personality psychology
- Network with each other, but also with internationally renowned experts
- Obtain insights and feedback from experts
- Access to focused “meta-knowledge” of experts (e.g., about jobs, publishing, etc.)
- Collaborate and continue working with experts

## Opportunities for Experts:

- Identify young talents and future leaders
- Build mentor-mentee relationships with the next generation of personality psychologists
- Platform to present (new) perspectives, methods, findings, etc. and stimulate

## Opportunities for Societies (e.g., EAPP, SPSP, ARP, ISSID, DPPD, etc.):

- Bring together members of different societies by a joint venture
- Have a creative vent for excess funds
